

College of Engineering, Construction and Living Sciences
Bachelor of Information Technology
ID721001: Mobile Application Development
Level 7, Credits 15
Practical

Assessment Overview

In this **individual** assessment, you will provide two short reports that will support you in the development of your mobile applications for the **Project** assessment.

Learning Outcomes

At the successful completion of this course, learners will be able to:

1. Implement and publish complete, non-trivial, industry-standard mobile applications following sound architectural and code-quality standards.
2. Identify relevant use cases for a mobile computing scenario and incorporate them into an effective user experience design.
3. Follow industry standard software engineering practice in the design of mobile applications.

Assessments

Assessment	Weighting	Due Date	Learning Outcomes
Practical	20%	Sunday 9th November at 11.59 PM	1, 2
Project	80%	Sunday 9th November at 11.59 PM	1, 2, 3

Conditions of Assessment

You will complete this assessment mostly during your learner-managed time. However, there will be time during class to discuss the requirements and your progress on this assessment. This assessment will need to be completed by **Sunday 9th November at 11.59 PM**.

Pass Criteria

This assessment is criterion-referenced (CRA) with a cumulative pass mark of **50%** over all assessments in **ID721001: Mobile Application Development**.

Submission

You **must** submit all report files via **GitHub Classroom**. Here is the URL to the repository you will use for your submission – https://classroom.github.com/a/Mq0MeQ_x. If you do not have not one, create a **.gitignore** and add the ignored files in this resource - <https://raw.githubusercontent.com/github/gitignore/main/Node.gitignore>.

Create a branch called **practical**. The latest report files in the **practical** branch will be used to mark against the marking rubric. Please test before you submit. Partial marks **will not** be given for incomplete functionality. Late submissions will incur a **10% penalty per day**, rolling over at **12.00 AM**.

Authenticity

All parts of your submitted assessment **must** be completely your work. The use of **AI tools** is not permitted in this assessment. You need to demonstrate to the course lecturer that you can meet the learning outcomes for this assessment. You **must** complete the [Academic Integrity Declaration](#) form and put this in the root of your repository. Failure to do this may result in a mark of **zero** for this assessment.

Policy on Submissions, Extensions, Resubmissions and Resits

The school's process concerning submissions, extensions, resubmissions and resits complies with **Otago Polytechnic** policies. Learners can view policies on the **Otago Polytechnic** website located at <https://www.op.ac.nz/about-us/governance-and-management/policies>.

Extensions

Familiarise yourself with the assessment due date. Extensions will **only** be granted if you are unable to complete the assessment by the due date because of **unforeseen circumstances outside your control**. The length of the extension granted will depend on the circumstances and **must** be negotiated with the course lecturer before the assessment due date. A medical certificate or support letter may be needed. Extensions will not be granted on the due date and for poor time management or pressure of other assessments.

Resits

Resits and reassessments are not applicable in **ID721001: Mobile Application Development**.

Instructions

Note: Please read the **Project** instructions before starting this assessment.

System Design - Learning Outcomes 1, 2 (10%)

- Write a short report (500-1000 words) covering the system design for each application (v1 and v2), including:
 - Application architecture and main components.
 - How data is managed, including loading from the **JSON** file.
 - Key design choices regarding scalability, maintainability and performance.

UI Design - Learning Outcomes 1, 2 (10%)

- Write a short report (500-1000 words) covering the UI design for each application (v1 and v2), including:
 - Responsive design for different screen sizes and orientations.
 - UI/UX decisions, including navigation, interactions and usability.
 - Wireframes or mockups for key screens showing layout and navigation.

Please submit the reports as either **.pdf** or **.docx** files in the root of your repository.
